Restriction/Election

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

The claims drawn to a method for treating or preventing or improving erectile dysfunction in a patient require election of species as follows:

- (a) between the growth factors FGF, EGF, PDGF, VEGF, or TGF, and a second election of species, wherein
- (b) if FGF is elected, the applicant must further elect from species of FGF between SEQ ID Nos. 2, 4, 6, 8.

Election of species as stated above is required, because a method of treatment using FGF would not require administration of other growth factors such as EGF, or PDGF, or VEGF or TGF. Each of the species of 'growth factors' forms a patentably distinct invention, and would require non-cohesive searches, and consideration thus posing a burden on the Examiner to examine all of the species in a single application.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1646

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Having shown that these inventions are distinct for the reasons given above, they have acquired a separate status in the art as recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has prima facie shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
